Metadata for The California Spatial Information Library (CaSIL; <http://new.casil.ucdavis.edu/casil/>)

OADL Element Name	ADL input Form labels	Control Vocabulary	<i>Element Content & Corresponding FDGC fields</i>
full-title	Title of Collection		Digital Orthophoto Quadrangle “IMPERIAL BEACH NE” GeoTiff CaSIL FGDC<title> Readme.file
short-title	Collection Name		doqq_geotiff_casil (assigned by librarian)
internal-name			Assigned by Librarian
lowercase-name			Assigned by Librarian
uppercase-name			Assigned by Librarian
responsible-party	Responsible Party ID	List	FGDC <origin> California Spatial Information Library
scope-and-purpose	Scope and Purpose of Collection		FGDC<descript> <descript> <abstract> Orthophotos combine the image characteristics of a photograph with the geometric qualities of a map. The primary digital orthophotoquad (DOQ) is a 1-meter ground resolution, quarter-quadrangle (3.75-minutes of latitude by 3.75-minutes of longitude) image cast on the Universal Transverse Mercator Projection (UTM) on the North American Datum of 1983 (NAD83).The geographic extent of the DOQ is equivalent to a quarter-quad plus The overedge ranges a minimum of 50 meters to a maximum of 300 meters.....</abstract> <purpose> DOQ's serve a variety of purposes, from interim maps to field references for earth science investigations and analysis. The DOQ is useful as a layer of a geographic information system and as a tool for revision of digital line graphs and topographic maps.</purpose>

			<supplinf> These DOQ's have been made available thru the California Spatial Information Library URL:http://gis.ca.gov. They have been reformatted into GeoTIFF format, with a metadata an FGDC compliant metadata entry in the description tag. </supplinf> </descript>
